

Health Coalition/Transportation Partnerships

Chelsey Patriss, Executive Director
Community Health Network for North Central Mass (CHNA 9)

Kym Williams, Program Director
Blue Hills Community Health Alliance (CHNA 20)

Community Health Network Alliances (CHNAs)

- ❖ Regional community health coalitions
- ❖ Convene/connect partners from multiple sectors to address population health problems
- ❖ Invest in best-practices; promote engagement and collaboration
- ❖ Focus on system and practice change
 - Healthy communities
 - Social determinants of health

Problem: Transportation Affects SDoH

1. Chronic Disease
 - Missed or delayed appointments, continuity of care, medication compliance
 - Low access to grocery stores/markets for fresh produce
2. Access to jobs and education
 - Schools, community colleges, universities
 - Bus routes/times don't align with second/third shift jobs
3. Mental and Behavioral Health
 - Low access to clinics, support services on fixed routes
 - Long wait periods between buses
4. Family Safety
 - Lack of mobility for people in unsafe homes
 - Walkability hazards

Solution: Transportation/Health Coalition Partnerships

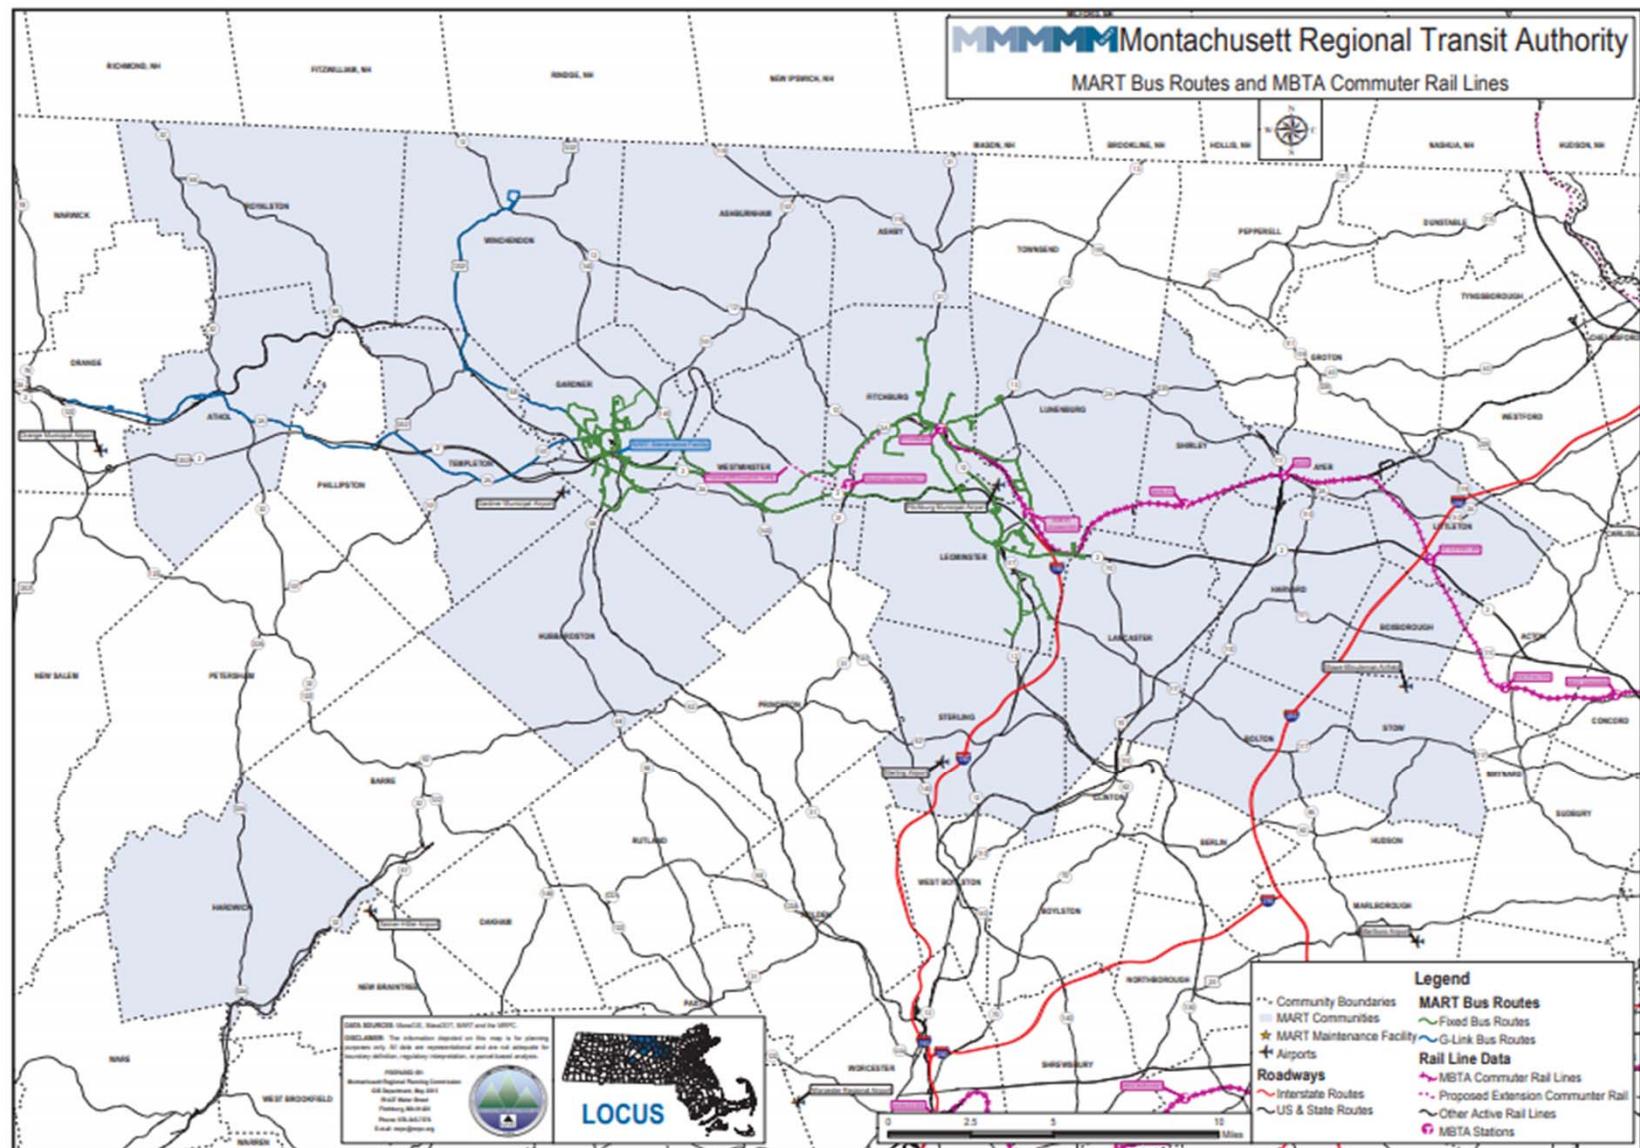

- ❖ Leverage networks, expertise and resources of multi-sector partners
 1. Regional Transit Authorities (RTAs)
 2. Human Service agencies
 3. Medical care and public health
 4. Municipal - city planning, CoA, health depts
 5. Education and schools

- ❖ Alignment and regional action plans

- ❖ Coordinated Efforts = Healthy Communities
