

Interactive Mapping Portal for Analysis and Crash Tracking (IMPACT)

Bonnie Polin

ADVANTAGES OF THE NEW IMPACT SYSTEM

- Provides crash summary information on all crashes accepted into the RMV crash data system including CURRENT crashes (previously the crash data portal was only for closed years which could be more than 2 years old).
- Provides PERSON level and VEHICLE/DRIVER level information not just crash level.
- Provides canned reports and dashboards for quick glance information as well as other user-friendly enhancements.
- Provides information specific to needs of law enforcement agencies so they benefit from good quality crash data and will work to improve upon the data.

Report

Standardized Reports

The Standardized Reports show Crash Report data broken down by a variety of different criteria.

Police Agency

The Police Agency report displays the number of Crash Reports entered into RMV's Crash Data System (CDS), broken down by police agency. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

Older, Younger, and JOL Driver Related Crashes by Injury Type

This report displays the number of older drivers (65+), younger drivers (< 21), and drivers with a junior operator license involved in reported crashes by injury type, broken down by year. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

Fatal Crashes by Town

The Fatal Crashes by Town report displays the annual and average number of fatal crash reports entered into RMV's Crash Data System (CDS), broken down by police agency (State or local city/town). The report defaults to the last 5 years, but any range of up to 10 years can be selected. Please note this is at the crash level and not at the person level so the report does NOT present the number of fatalities.

Reports Entered by Police Agency by Month

The Reporting Levels by Police Agency report shows the number of Crash Reports entered into RMV's Crash Data System (CDS), broken down by month. The report defaults to the current year, but other years can be selected as well.

Driver Distractions in Crashes

The Driver Distractions report displays the information pertaining to distractions by drivers who were involved in reported crashes entered into RMV's Crash Data System (CDS), broken down by the type (if any) of driver distraction. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

Crashes by Urban Type and Functional Class

This report displays the number of Crash Reports entered into RMV's Crash Data System (CDS), broken down by urban type and functional class. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

Crashes by Severity

The Crashes by Severity report displays the number of Crash Reports entered into RMV's Crash Data System (CDS), broken down by crash severity. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

Pedestrian, Cyclist and Motorcyclist Crashes by Injury

This report displays the number of pedestrians, cyclists and motorcyclists who were involved in reported crashes entered into RMV's Crash Data System (CDS), broken down by year and injury level. The report defaults to the last 5 years, but any range of up to 10 years can be selected.

2015-2019 Pedestrian, Cyclist and Motorcyclist Crashes by Injury

created: 10/10/2019

Bicycle, Pedestrian, Motorcycle Injury Type	2015	2016	2017	2018	2019
Cyclist: Fatal injury	11	8	11	4	3
Cyclist: Non-fatal injury	1,038	1,081	1,018	921	723
Cyclist: Not Reported	49	76	36	30	19

Pedestrian: Total	2,236	2,340	2,325	2,144	1,302

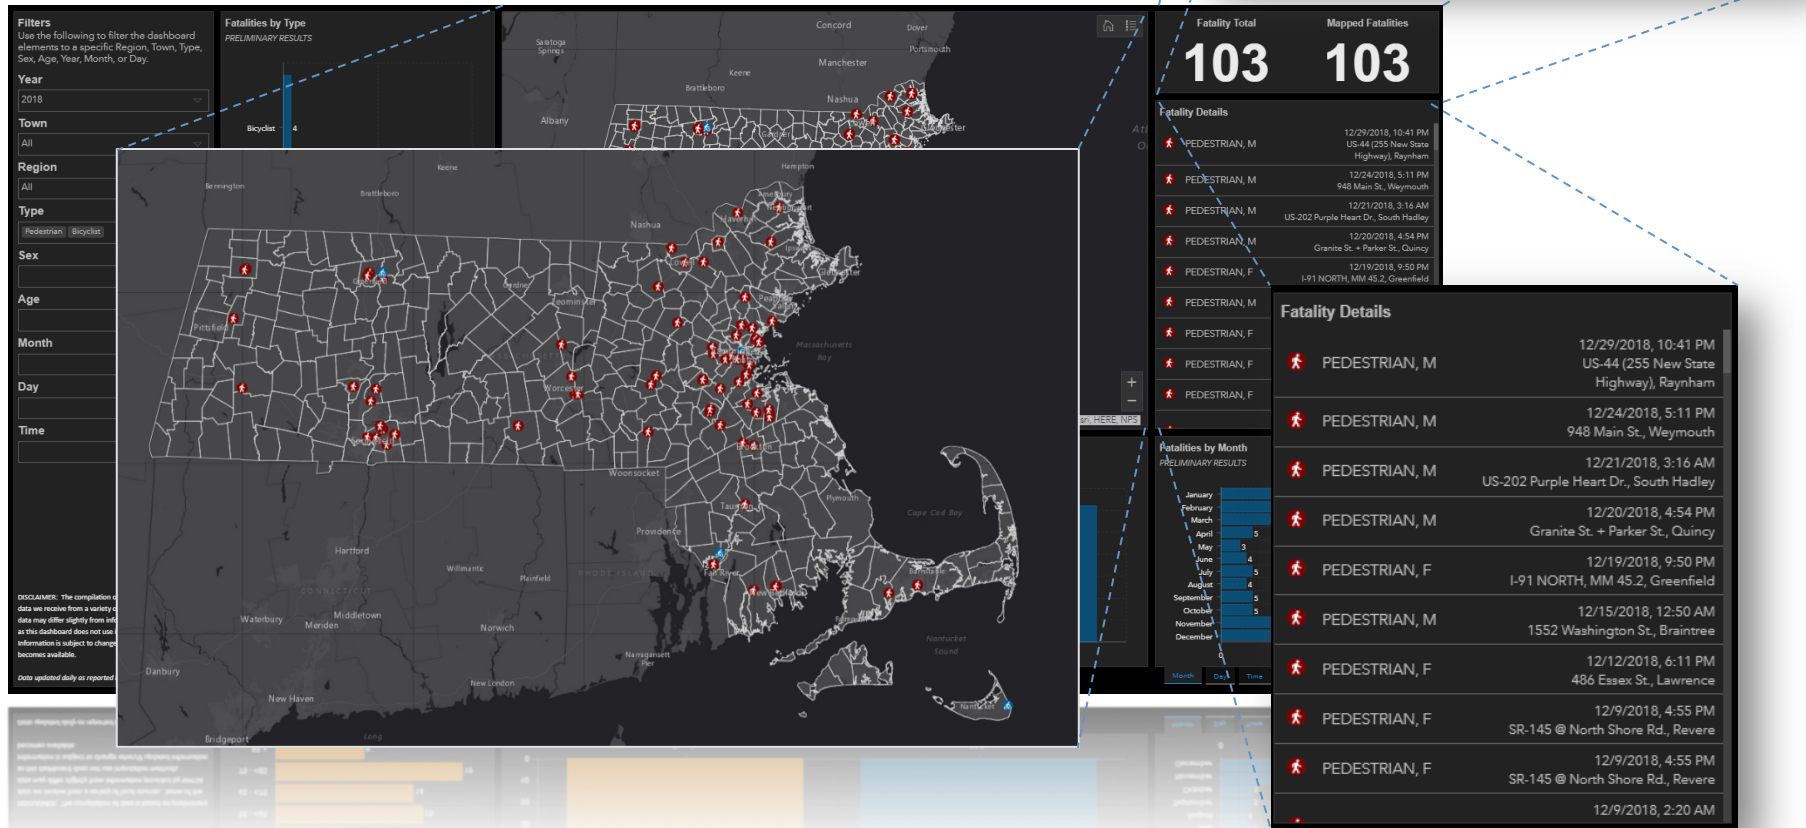

MassDOT makes no representation as to the accuracy, adequacy, reliability, availability or completeness of the crash records or the data collected from them and is not responsible for any errors or omissions in such records or data. Under no circumstance will MassDOT have any liability for any loss or damage incurred by any party as a result of the use of the crash records or the data collected from them. Furthermore, the data contained in the web-based crash report tool are not an official record of what transpired in a particular crash or for a particular crash type. If a user is interested in an official copy of a crash report, contact the Registry (<http://www.mass.gov/rmv/>).

The City of Boston Police Department may be contacted directly for official copies of crash reports and for crash data pertaining to the City of Boston. In addition, any crash records or data provided for the years 2018 and later are subject to change at any time and are not to be considered up-to-date or complete. As such, open years' of crash data are for informational purposes only and should not be used for analysis.

The data posted on this website, including crash records and other reports, are collected for the purpose of identifying, evaluating or planning the safety enhancement of potential crash sites, hazardous roadway conditions or railway-highway crossings. Under federal law, this information is not subject to discovery and cannot be admitted into evidence in any federal or state court proceeding or considered for other purposes in any action for damages that involves the sites mentioned in these records (see 23 USC, Section 409).

For additional information regarding the data presented on this website, please contact the Registry (<http://www.mass.gov/rmv/>). The data presented on this website is for informational purposes only and should not be used for analysis. The data is not an official record of what transpired in a particular crash or for a particular crash type. If a user is interested in an official copy of a crash report, contact the Registry (<http://www.mass.gov/rmv/>).

Data Query & Visualization

Crash Query And Visualization

Welcome

The **Query and Visualization Tool** is a web application built to provide crash-related data, maps, and charts for the state of Massachusetts. Providing crash data and the ability to analyze this information will encourage public safety initiatives and awareness. It is primarily for this reason that this tool has been made available. Analysis of the crash data is a complex undertaking, one that may require trial and error on the part of users. It is suggested you approach this information as a tool rather than an end in itself and that you cross-check your results with other data sources.

Upon entering the tool, you will first be asked to select your data level of interest (crash level, vehicle level or person level) and will next be asked to select the fields you want to include in your query results.

System Information

The system is currently available.

Supported Browsers

This site is best viewed at a screen resolution of 1600 x 900 or greater.

This application deals with large amounts of data so it is recommended that 64-bit browser versions are used. You may encounter a problem using 32-bit browsers.

Disclaimer
MassDOT makes no representation as to the accuracy, adequacy, reliability, availability or completeness of the crash records or the data collected from them and is not responsible for any errors or omissions in such records or data. Under no circumstance will MassDOT have any liability for any loss or damage incurred by any party as a result of the use of the crash records or the data collected from them. Furthermore, the data contained in the web-based crash report tool are not an official record of the Registry (<http://www.mass.gov/rmv/>). The City of Boston Police Department may be contacted directly for official copies of crash reports and for crash data pertaining to the City of Boston. In addition, any complete, if a user is interested in an official copy of a crash report, contact the Registry (<http://www.mass.gov/rmv/>). The data posted on this website, as such, open years' of crash data are for informational purposes only and should not be used for analysis. The data posted on this website, including crash records and other reports, are collected for the purpose of identifying, evaluating or planning the safety enhancement of potential crash sites, hazardous roadway conditions or railway-highway crossings. Under federal law, this information is not subject to discovery and cannot be admitted into evidence in any federal or state court proceeding or considered for other purposes in any action for damages that involves the sites mentioned in these records (see 23 USC, Section 409).
