Student Reflection

“It was so valuable to learn about transportation challenges, to have the opportunity to ride the shuttles to really get a sense for just how challenging coordination of a huge geographic space is. It was important to hear from riders, drivers and community agencies the role transportation plays and the things that it can impact. Many of the things directly and indirectly impact health. Overall the experience that [QV CDC] provided was incredibly rich and I feel like I learned so much... The [Population Health Clerkship] was incredibly impactful and will most definitely influence my future practice.” -PURCH Student, 2021
