Snowstorms
If you help others get what they want, they will help you get what you want.
Pilgrim Nuclear Power Plant Exercises
Partnerships

When City Hall was on fire back in August of 2010, it was our DPW who assisted our agency in preparing the foundation for our new home.
Sandbagging
Flood Mitigation
The Taunton Emergency Management Agency is responsible for coordinating the FEMA reimbursement process for the community. We collect and confirm the data provided by city departments and package calculations and supporting documentation to MEMA and then FEMA when a presidential declaration is approved. Counties must reach a financial threshold in order to qualify for reimbursement.

This only occurs when a presidential disaster is authorized.
FEMA STORM REIMBURSEMENT

Maintain accurate records of your inventory. Know how much you had at the storm’s beginning, and know what remains.
It’s critical to set up a system to track the equipment you’ll be using and the individuals who will operating it. FEMA typically provides a forty-eight hour period of expenses. Defining the period your community incurs the greatest costs is critical to maximizing your reimbursement. Consider MS’s Excel Data Validation function.
This only occurs when a presidential disaster is authorized.

Equipment Description
Sheltering

Join us on Stump April 20th when Rick Ferreira, Taunton's Emergency Management Director will join us and discuss the important relationship between DPW and Emergency Management and how we all work together.

This only occurs when a presidential disaster is authorized.
Hold it Right There!
TRACKING TREE DEBRIS

Tracking what you remove, where you take it, and the quantity becomes an important piece of information. FEMA’s reimbursement process involves the use of its Grants Portal system. Depending on what you are seeking reimbursement for, the system asks cascading questions, which will need to be answered to continue the process.
Schedule of Equipment Rates

The rates on this Schedule of Equipment Rates are for applicant-owned equipment in good mechanical condition, complete with all required attachments. Each rate covers all costs eligible under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121, et seq., for ownership and operation of equipment, including depreciation, overhead, all maintenance, field repairs, fuel, lubricants, tires, OSHA equipment and other costs incidental to operation. Standby equipment costs are not eligible.

Equipment must be in actual operation performing eligible work in order for reimbursement to be eligible. **Labor costs of the operator** are not included in the rates and should be approved separately from equipment costs.

Information regarding the use of the Schedule is contained in 44 CFR § 206.228 Allowable Costs. Rates for equipment not listed will be furnished by FEMA upon request. Any appeals shall be in accordance with 44 CFR § 206.206 Appeals.
### Equipment Rates

- This only occurs when a presidential disaster is authorized.
